

Standard Template Library → C++ STL

Collection of built-in Data Structures for faster performance in C++. It is similar to the collections Framework in Java.

The most important libraries of STL are : $\rightarrow$

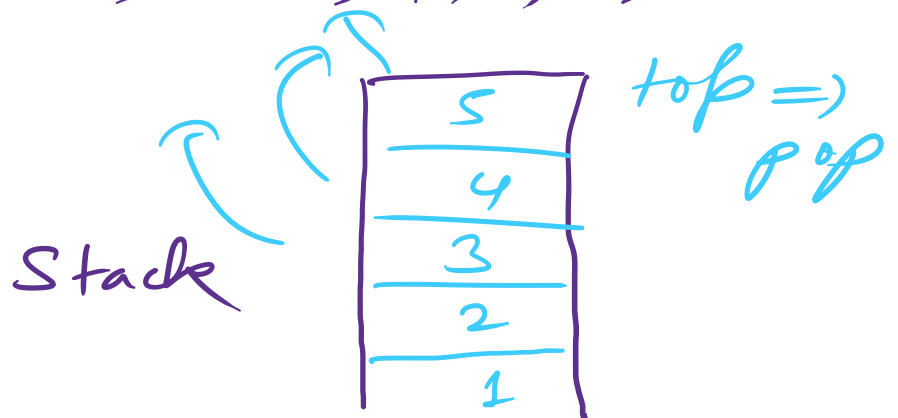

- ① stack
- ② queue
- ③ list
- ④ forward-list
- ⑤ map
- ⑥ unordered-map
- ⑦ vector
- ⑧ set
- ⑨ unordered-set

#include <lib>
 ↓
 name

Reverse a Given Queue

queue<int> num = 1, 2, 3, 4, 5 ✓ empty (pop)

rev Inverse (num) $\rightarrow 5, 4, 3, 2, 1$

`STL::list` → forward-list , list
 ↓
 singly linked list doubly linked list
