

Standard Template Library contd...

STL :: map $\rightarrow$ $\langle \text{Key} : \text{Value} \rangle$

Keys are unique

Values can be duplicate

Menu-Item	—	Price
$\langle \text{string} ,$		$\text{int} \rangle$
$\langle \text{Dosa} ,$		$50 \rangle$
key		value

} HashMap

map $\rightarrow$ follows alphabetical order
unordered_map $\rightarrow$ follows hashing order

* Demonstrate how we can use the C# STL :: map with a list of strings.

* Map with List of Strings

* map
* list
* strings

map $\langle \text{string} , \text{list} \langle \text{string} \rangle \rangle$
 $\swarrow$ pair.first
 $\downarrow$ pair.second
collection
array

Student Fav Food $\Rightarrow$

String $\swarrow$ Anvitha $\Rightarrow$ dosa, idli, pizza
Chaithanya $\Rightarrow$ rava idli, paddy, ghee rice
list
strings
